

Hoo-hoo-Hoo-hoo We Are

Who We Are

Windows on Wildlife is a 501(c)3 non-profit organization that is dedicated to educating, inspiring, and empowering people with a love of nature and a desire to protect it.

Educational Philosophy

Programs are designed to be fun and engaging. They blend inquiry-based instruction with hands on activities. All programs are aligned with the Massachusetts Curriculum Frameworks.

What Schools Say

Excellent, age-appropriate material
Fun and educational experience
Enjoyed so much, we will be calling again

For Who

People of all ages: from kindergarteners to senior citizens

Hours

Programs are offered days and evenings, weekdays and weekends

Wildlife

WOW provides a permanent home to birds who are unable to be returned to the wild. It operates under state and federal permits.

Teacher's Experience

Harvard Graduate School of Education EdM.
Mass Audubon Teacher
Harvard Museum of Natural History Guide

Photo Use Granted by Dorling Kindersley

Programs

K-2

Habitat

Discover where raptors live and how they have adapted to a wide range of habitats: from the Arctic tundra to the alpine meadows.

Learning Standard: Characteristics of Living Things and Living Things & Their Environment

★ Life Cycle of Raptors

A brancher is a baby owl that can survive outside the nest but still needs its parents to feed it. Learn about the changes Raptors go thru as they journey from an egg to an adult.

Learning Standard: Characteristics of Living Things

The Fossil Record

The oldest known bird fossils were unearthed in

China in 2006. Learn the story they tell of the carnivorous dinosaur's transformation into the raptors of today.

Learning Standard: Evolution & Biodiversity

Other Groups

All programs can be adapted for other groups such as scouts, after-school programs, home schools, community events, seniors, and others.

Grade 3

Wampanoag Indians

Only the bravest Wampanoag warriors were allowed to wear the Eagle tail feather. Discover the respect these birds commanded in a culture that viewed all life as sacred.

Learning Standard: Describe the Wampanoag way of life.

Grades 3-5

Habitat

Discover where raptors live and how they have adapted to a wide range of habitats: from the Arctic tundra to the alpine meadows.

Learning Standard: Adaptations of Living Things

★ Life Cycle of Raptors

A brancher is a baby owl that can survive outside the nest but still needs its parents to feed it. Learn about the changes Raptors go thru as they journey from an egg to an adult.

Learning Standard: Structures and Functions

The Web of Life

A Barred Owl will eat almost 17,000 mice in its lifetime, yet the population of mice is never depleted! Discover the dynamic balance of species

interaction in a process known as "The Web of Life".

Learning Standard: Energy and Living Things

Grades 3-5

★ Adaptations

Kestrels hunt in open territory by hovering in the air, looking for prey on the ground below. Explore the adaptations that make raptors the most efficient winged predators in the world.

Learning Standard: Characteristics of Plants & Animals and Adaptations of Living Things

Art on the Wing

Since hunters first painted on the walls of caves, art has helped define who we are. Explore the ways raptors have been depicted in art and create two original works using live birds as models.

Learning Standard: Methods, Materials, and Techniques, Elements and Principles of Design, Observation, Abstraction, Invention, and Expression
